## Preparations for the Presentation

As a preparation for the presentations, ESRs should prepare a **one-three page summary** of the points addressed in the presentation, as well as a paragraph on the connection of the research with the relevant Work Package.

The summary should be sent to Oleksandr Bulayenko before **20 April 2018**. All the summaries will be printed out and made available to the participants of the doctoral seminar.

The purpose of **Work Packages** is to facilitate and structure exchanges between ESRs having similar research interests. ESRs belonging to the same Work Package are asked to exchange preliminary versions of their presentations and summaries and to provide comments on each other's documents. ESRs are free to decide the way you are going to implement this activity (e.g., by email or Skype). Other persons do not need to be informed about the content of the discussions. It is important that this activity takes place before the summary and the presentation are submitted.

## Presentation Guidelines

The main purpose of the doctoral seminar is to provide doctoral candidates at different stages of their research with the opportunity to report on their research and to receive feedback from the professors and other doctoral candidates. The discussion should not be centered on the specific details of a particular dissertation. Rather, the focus is to be placed on proper topic identification, the research methodology and the structure of the dissertation.

Each doctoral candidate is considered to be an expert in the field of her or his research. Hence, the presentation should not attempt to show how much one knows about the topic. Accordingly, the doctoral candidate is expected to limit the presentation to the following four slides:

- (1) **Topic** (preliminary) of the thesis; **Names** of the doctoral candidate and his supervisors; **Work Package**
- (2) **Research problem(s)**: What are the major problem(s)?
- (3) **Research question(s)**: Which research question(s) will be answered?
- (4) **Methodology**: What research methodology is used to answer the research question(s)?
- (5) **Structure**: How has the dissertation been structured (or how will it be structured) to answer the research question(s)?

All students are asked to communicate the stage they have reached in their research at the beginning of their presentation. **Presentations should not exceed 10 minutes**. The time-limit will be strictly enforced in order to provide all the 15 doctoral candidates with an equal opportunity to present their research and to receive feedback.

The presentation will be followed by a discussion. The designated commentator will begin the discussion with her assessment of the presentation in light of the 5 points listed above. Thereafter, the floor will be opened for questions and comments from other presenters and seminar attendees.
